Safety Council of Northwest Ohio

CLASSROOM TOPICS

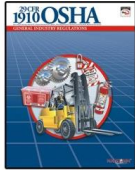

This electrical safe work practices instructional class aids in the steps toward fulfilling:

NFPA 70E 2018 Article 110.2

and

OSHA 29 CFR Sub Part S 1910.332(b)(3)

The course provides general knowledge and understanding of the existence, nature, causes, and methods to prevent electrical hazards.

Instruction includes:

- Training on arc flash awareness
- Standards and codes
- Understanding of arc flash energy values
- Selection and use of appropriate PPE
- Reading & following warning signs/labels
- Methods to reduce risk while working on live exposed parts
- Arc flash hazard assessments
- Safe work practices documentation
- Basic elements of how to develop an effective electrical safe work practices program
- How NFPA 70E is used to help with OSHA electrical standards compliance
- Employer's on site electrical task training requirements to determine your employee is Qualified to perform energized work.

In addition to the training, OSHA and OSHA On-site Representatives will speak on OSHA regulations. Free electrical compliance consultation services employers can take advantage of to create a compliant and safer workplace will be discussed.

WHO SHOULD ATTEND

Anyone who works on energized electrical equipment 50 volts and above must receive Electrical Safety training to comply with the OSHA CFR 1910.332 Regulation.

- ✓ Electrical Trades Personnel
- ✓ Supervisors
- ✓ Engineers
- ✓ Safety Managers
- ✓ **Any employee who is determined by the Owner as a qualified electrical employee working on energized electrical equipment.**

Safety personnel should also attend to evaluate/establish their facility safety programs and identify the needs of their employees.

CLASSROOM MATERIALS

- Employee Qualification Sheet Example
- Specific Task Training Examples
- Certificate (upon test passage)
- Employer Safety Responsibilities "Points of Discussion"

Presenter

Bob Nicholson
JDRM Engineering
(NFPA Certified Electrical
Safety Professional)
